**TechnoSys Group** is a regional company working in the Middle East and Africa. It is a pioneer with distinguished customers, specialized services and in its solid basis that led to its establishment.

**Board of Directors** strategized the focus and the specialty of **TechnoSys** to exclusively focus on insurance & Takaful automation introducing to the market state-of-the-art systems named "**AIMSweb** - Advanced Insurance Management Suite-fully web enabled" based on Oracle, web and mobile technologies. This led **TechnoSys** to maintain steep ascending growth with solid financial stability.

**AIMSweb** is a future-ready solution; since it keeps up with current and futuristic trend of information technology, in addition; **AIMSweb** is a cost-effective solution for all processes of the insurance industry.

**AIMSweb** incorporates (300+) man-years of cumulative development. **AIMSweb** version (12.0)NEO, released in 2020, runs successfully at major insurance-references in (12) countries and used by (3000+) insurance experts daily. **AIMSweb** is currently supported by **TechnoSys** team of (300+) man-year experience in insurance & Takaful automation.

**TechnoSys** consultants are working in a spirit of teamwork to introduce complete technical and reliable services. **TechnoSys** adopts practical workable methodologies for development, support, quality assurance, customer-care and after-sale services, which are gained from working in the insurance industry of emerging countries over two decades. To that end, **TechnoSys** is currently **CMMi** level 3 certified for high international standards in development and quality assurance. Being a **CMMi** level 3 certified company, is a major achievement as a regional IT company.

To expand vertically, and to give insurance customers highest level of quality products and services, **TechnoSys** had established subsidiary companies **HiQSys Saudi** in Saudi Arabia and **AIMSWEB Emirates Company** in UAE to support current and future insurance customers in Saudi Arabia, Emirates and Gulf. **AIMSweb** enjoys dominant market shares of about 50%+ in many countries like Saudi Arabia (the giant Takaful Market worldwide), other GCC countries, and others.

To capitalize on current cumulated insurance-knowledge-management that **TechnoSys** enjoys, **TechnoSys** is currently conducting unique courses in insurance principles with mapping of these principles to **AIMSweb** as a software application contains encapsulated knowledge of many markets. **TechnoSys** founded insurance institution to train on "**applied-insurance**" courses with proper accreditation to be gained from international-insurance-institutes. It is named **AIMSACADEMY**

**TechnoSys** have introduced couple of new unique suite of products to comply with the latest advancements of technology, **BroMIS** (Brokerage Management Information System) to enhance the role of brokerage firms. **AIMSPAD** and **AIMSCLOUD**, Both new released products will help insurance company to access **AIMSweb** by using iPad, iPhone, ANDROID phones & Tablets and others. This will totally shift the paradigm of insurance to **e-consumerization**-concept. This will open new marketing channels and make better controls on the business with much lesser costs & quite-ease-of-use. No more complexities in having IT datacenters and high cost software licensing. This will result in extreme reduction in Total-Cost-of-Ownership (**TCO**) of **AIMSweb** and ease-of-use thru Pads and Tablets ■
